### **Infosys International, Inc. donates \$55,000 in software to manage collaborative efforts for Stony Brook's Center of Excellence in the Wireless Internet & Information Technology**

*Infosys International, Inc., a leading Long Island e-business and information technology company, has donated its recently developed BluePearl software to help manage the work of the Center of Excellence. This gift demonstrates the invaluable resources and ingenuity local companies can provide to the economic development of the tri-state region.*

STONY BROOK, NY - October 4, 2002 Infosys International, Inc. has donated its BluePearl Software to support Stony Brook University's Center of Excellence in the Wireless Internet and Information Technology. This generous \$55,000 gift will help track the substantial private industry match required for the Center.

Since 1986, Infosys International, Inc. has built a solid reputation as a business and information technology consulting firm, serving public and private industry as well as government and not-for-profit organizations. Its BluePearl software is a comprehensive Customer Relationship Management (CRM) solution that tracks detailed information about donors, referrals, and community members and their history with an organization. BluePearl also provides features to efficiently manage internal operations such as human resources and volunteer management, literature and promotional resource management, event scheduling and mail tracking.

This important donation comes at a critical time for Stony Brook's newly unveiled Center of Excellence in the Wireless Internet and Information Technology proclaimed by Governor Pataki on August 2, 2002 at a special press conference at Stony Brook University. The industry-driven Center represents a total investment of \$230M from state, federal and private sources and is expected to create thousands of high tech jobs throughout New York State.
