Raspberry Pi 102

Raspbian

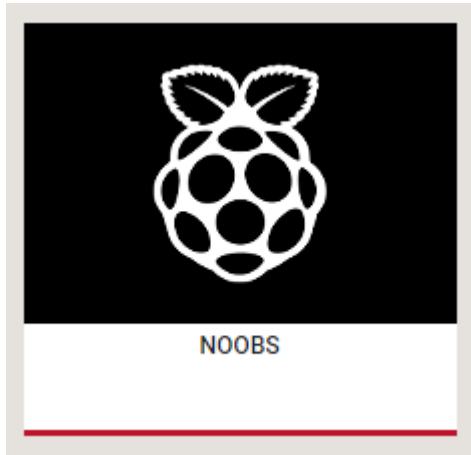

Matthew A. Cordaro

Items You Need

- Raspberry Pi (Model 3 B)
 - ◆ Any will do
- Power Supply
 - ◆ Model 3 B Uses Micro B
 - ◆ Old Android charger
- Monitor with supporting HDMI cable
- USB Keyboard
- USB Mouse
- Computer / Laptop
- MicroSD card
 - ◆ USB / SD card adapter

NOOBS

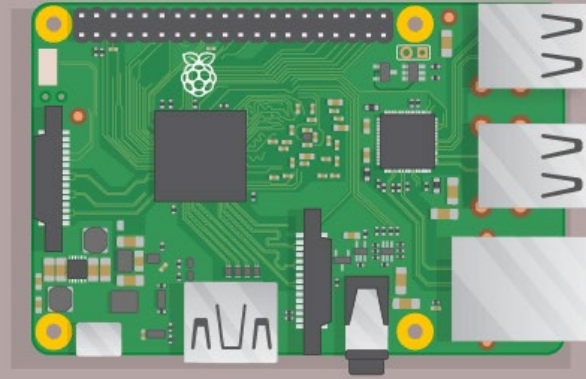

1. www.raspberrypi.org/downloads/noobs/
2. Click download ZIP
3. Copy ZIP to blank microSD card

A screenshot of a web browser displaying the NOOBS download page. The browser's address bar shows the URL "https://www.raspberrypi...". The page features a red header with the word "NOOBS" in white. Below the header, there is a paragraph of text explaining that beginners should start with NOOBS and providing links to retailers like Pimoroni, Adafruit, and The Pi Hut, as well as links to a software setup guide and a NOOBS setup guide video. Another paragraph describes NOOBS as an easy operating system installer containing Raspbian and LibreELEC. A third paragraph describes NOOBS Lite. At the bottom, there is a section for "NOOBS" with a sub-heading "Offline and network install", showing the version as 3.0.0 and the release date as 2018-11-16. Two buttons, "Download Torrent" and "Download ZIP", are visible. Below this section, the SHA-256 hash is displayed: 9d0637e2987efc686caf2de6b3f27bac9b7539d9f939fbb7fd961d800e88ae99.

Alright you Noobs... Let's boot up NOOBS!

Go ahead, break it!

Just don't actually break it.

You know what I mean...
